

## **Course Prerequisites and Co-requisites**

Course PREREQUISITES are requirements (i.e., other courses or conditions) that must be satisfactorily completed/met before enrolling in a specified course

**COURSE PREREQUISITE ALERT/WARNING** - To better ensure academic success, prior to registering for or adding specific courses, students should review catalog course descriptions to determine what (if any) prerequisite requirements must be completed prior to enrolling in the described course. Students NOT meeting the necessary prerequisite requirements for a course should not enroll in the described course; unqualified registrants will be required to drop the affected course. Courses with prerequisite requirements are identified in the current class schedule with a "P" in the "P-C-\$-I" column of the schedule.

Course CO-REQUISITES are courses that must be taken concurrently. Prior to registering for or adding a course, students should review catalog course descriptions to determine if the course described has any co-requisite courses. Courses listed as co-requisites must be taken in the same block/term. Co-requisite courses are identified in the current class schedule with a "C" in the "P-C-\$-I" column of the schedule.
