The General Electives (titled Z-electives) is an area with two purposes. First, almost all degrees require general electives. This is the area that all courses that are counting towards elective requirements will appear.

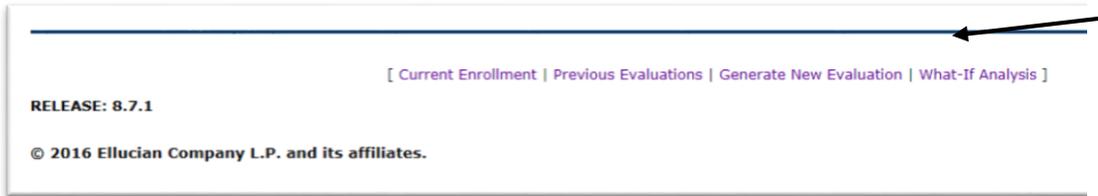

Second, this area is purposely set up to be larger than most programs requirement for electives so that it will catch any course that is passing with a D- or higher and college level, but is not applying to your major, general education, or minor

The excess credits allowed in the electives area helps to make sure that credits taken that do not meeting other requirements are used to help you reach the overall credit goal of the degree.

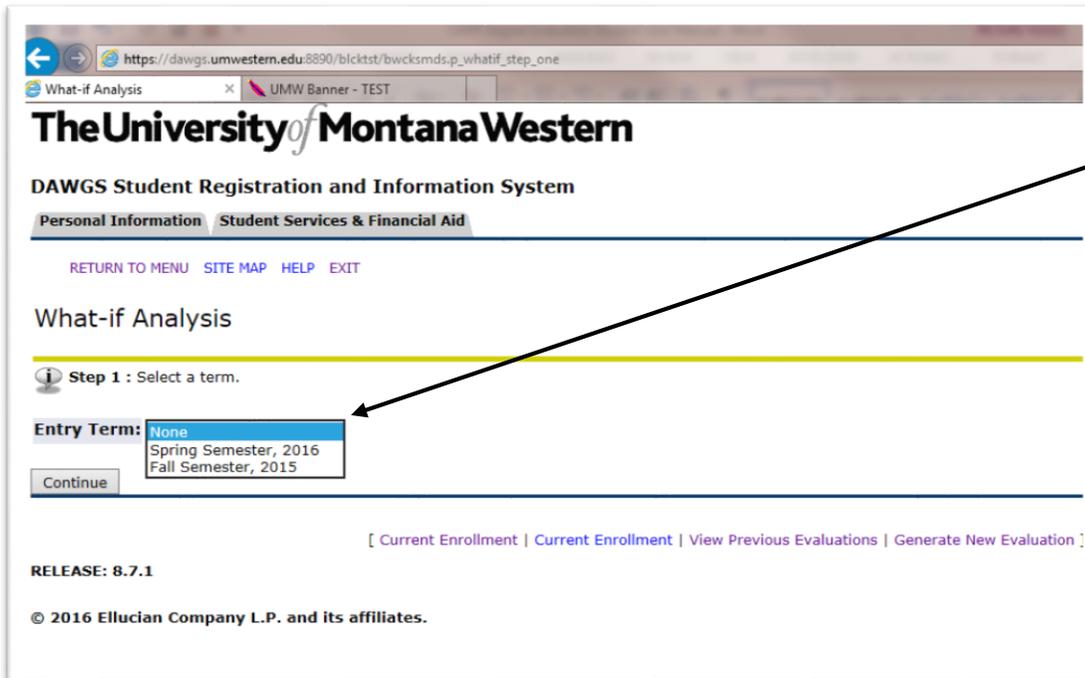

Make sure to check the catalog to make sure you know exactly how many credits you need for electives.

# What-If Analysis

If you are considering changing your major, you can use the What-If Analysis to see which courses of the classes you've already taken can be used to complete the degree requirements of another degree.

To perform a What-If Analysis, click on the link at the bottom of the page.

First choose the catalog year of the degree you are interested in by selecting a term that the degree correlates i.e. a degree from the 2015-16 catalog will be in the Fall 2015 and/or Spring 2016 term. Then select Continue
