

Undergraduate Research Opportunity in Fish Muscle Physiology

- **Description:** Undergraduate research opportunity in fish muscle physiology to join an NSF-funded project investigating the kinematics and biomechanics of fish locomotion. You will learn basic laboratory setup and protocol, participate in instrument calibration, contribute to experimental design, and be trained in basic surgical techniques. You will also be trained in aquatic animal husbandry, learn how to analyze scientific data and have the opportunity to present research at a scientific meeting.
- **Qualifications:** Strong interest in biology, working with animals in a laboratory setting, and interest in scientific research. If this opportunity interests you.
- **Please contact Dr. Bradley Wood at bradley.wood@umwestern.edu.**
